

SPECIAL MORTAR
MANUFACTURING UNIT DESIGNED FOR
OIL AND GAS

About us

ECOINDUSTRY is a testament to the entrepreneurial spirit in Angola, championing innovation and industrialization in the country. With a focus on upholding the high-quality standards of renowned European manufacturers, we produce and distribute top-tier brands globally.

The ECOINDUSTRY JUNTEX Industrial Unit represents a strategic investment in the future, boasting unrivaled production capacity in Africa. Originally designed by SONANGOL for mortar production in the Oil and Gas industry, this facility has been reactivated and stands ready to collaborate with key stakeholders in the sector.

ECOINDUSTRY is a certified supplier for the Oil & Gas Industry by ANPG.

WITH US IT HAPPENS!

Quality

ECOINDUSTRY JUNTEX showcases its dedication to quality and customer satisfaction through its ISO 9001 certification for the Quality Management System, granted by SGS.

Our Most Valuable Asset: Our People!

At ECOINDUSTRY JUNTEX, we highly value our employees and prioritize creating a supportive work environment. We actively encourage and support continuous learning and development, which enhances the skills and knowledge of our team members.

Our relentless pursuit of excellence sets the ECOINDUSTRY JUNTEX team apart.

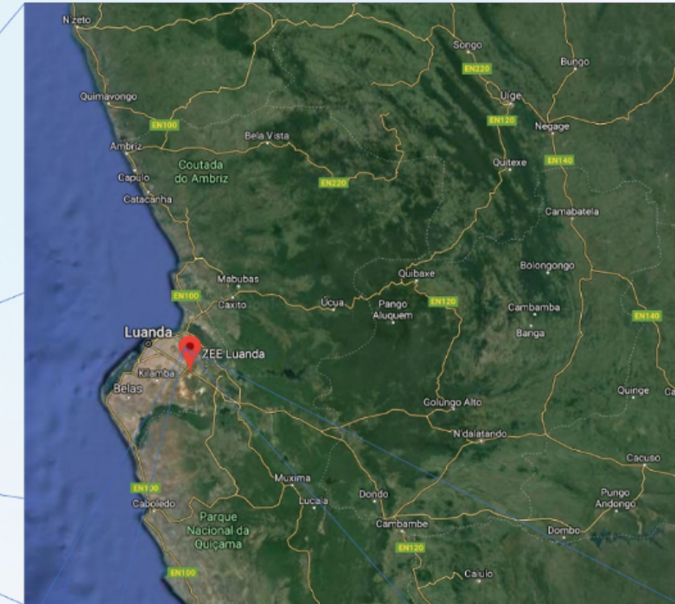

Where we are

Location:

Luanda-Bengo Special Economic Zone (SEZ) – ANGOLA

The Luanda-Bengo Special Economic Zone (SEZ) was established in October 2009 to drive the growth of the Angolan national economy. Spanning over 8,300 hectares, this industrial zone provides all the essential infrastructure for the installation of industrial units (IUs) across diverse sectors. The SEZ offers modern and tailored facilities to ensure the success of projects brought to its premises in various industries.

Machinery and Equipment

Other

Staff

ECOINDUSTRY boasts a highly skilled and multidisciplinary technical team with expertise in the following areas:

- Chemical engineering
- Production engineering
- Mechanical engineering
- Civil engineering
- Geology
- Environmental engineering
- Quality control
- Economics
- Business management

Additionally, our workforce comprises 25 dedicated individuals responsible for handling, processing, storage, and dispatch of all our products.

At ECOINDUSTRY, our vision is to become a benchmark in the mortar manufacturing sector and be renowned for our ability to successfully execute and deliver projects.

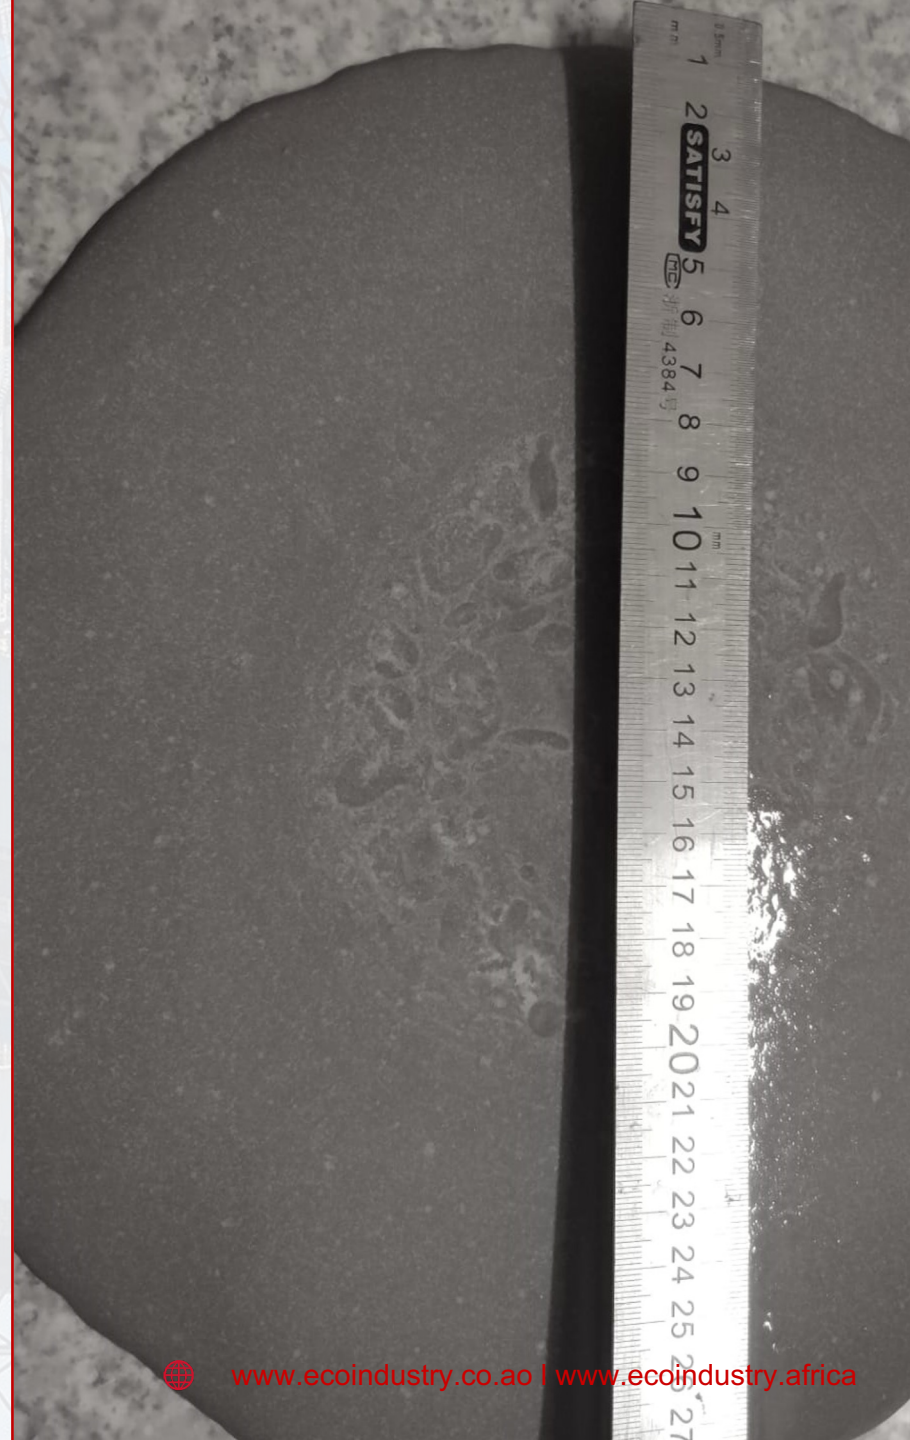

Quality Control

The ECOINDUSTRY Laboratory was established to offer comprehensive analytical support to our manufacturing operations and is overseen by a team of specialized technicians. Its primary objective is to ensure rigorous quality control by providing the necessary infrastructure and expertise. The laboratory is equipped to develop analysis methodologies covering a wide range of chemicals and mortar products.

Key activities carried out by our laboratory include:

- Method selection, verification, and validation
- Sampling procedures
- Quality control of raw materials
- Technical documentation management
- Result validity assessment
- Uncertainty analysis
- Presentation of findings
- Handling of complaints
- Non-compliance resolution
- Data control and information management

By conducting these activities, our laboratory plays a vital role in maintaining the highest standards of quality and ensuring the reliability of our products.

Safety

ECOINDUSTRY recognizes Health and Safety in the workplace as one of the fundamental rights of the worker and a key element for the Group's sustainability.

All decisions taken must respect health and safety in the workplace.

A Health and Safety at Work Policy has been adopted and continues to be improved, based on the development of a Safety Management System (SMS) and individual and collective prevention measures to minimise the potential risk of injury and/or stress in the workplace.

The aim is to guarantee excellent working conditions at an industrial level, in accordance with the principles of hygiene, industrial ergonomics, organizational processes and individual actions.

ECOINDUSTRY believes in the dissemination of the culture of accident prevention and risk awareness among Employees, actively promoting this culture through specific training and information courses.

Employees must consider themselves personally responsible and thus adopt all the preventive and behavioral measures designed by the company to protect their health and safety; measures disseminated through specific directives, instructions, training and information.

What we can do for Oil&Gas

MORTARS BY DESIGN

In conjunction with the customer, ECOINDUSTRY is able to produce various types of oil cements regardless of the product formulations. The main percentage of raw materials (sand and cement) can be sourced locally with thorough quality control.

The formula can meet the requirements desired by the customer, with the possibility of closely monitoring production.

Together we can provide you with: Portland cement for construction and surface casing, cements of API Class A, G and H to match the required level of temperature and pressure, and silica blend cements.

What we can do for Oil&Gas

The purest QUARTZ CRYSTALLINE

Controlled in the laboratory and produced entirely in Angola, our sands are carefully selected and can be used in the most demanding systems with the ECOINDUSTRY quality seal.

Various Calibres Available

0 a 0,4 mm

0,6 a 0,8 mm

0,4 a 0,6 mm

0,8 a 2 mm
