www.ecoindustry.co.ao | www.ecoindustry.africa

ECOINDUSTRY was born out of Angola's entrepreneurial spirit, driving the country's economic diversification and industrialization. Based on the high quality standards of prestigious European producers, we produce in Angola and market the best brands to the world.

We demonstrate our commitment to quality and customer satisfaction through the **ISO 9001** certification of our Quality Management System. In addition, we are a certified supplier by the **Associação Nacional de Petróleo e Gás (ANPG)**, reinforcing our credibility and compliance with the most demanding standards in the sector.

We also have a strong commitment to environmental sustainability, favoring the use of local resources. This approach reduces dependence on imports and contributes to lower carbon emissions, helping to mitigate the country's ecological footprint.

EMPRESA CERTIFICADA

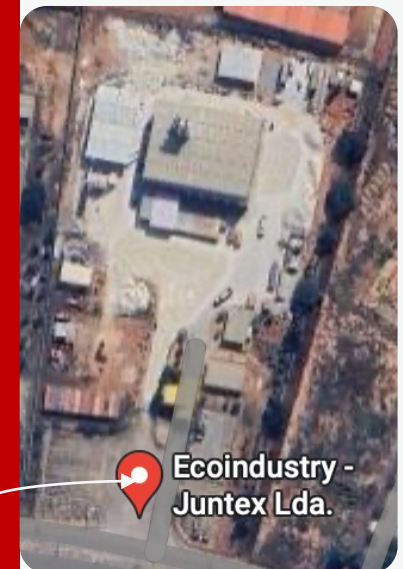

ISO 9001

Qualidade

At the Patriota industrial unit, a variety of chemicals are produced for the treatment of drinking water, industrial water, and swimming pools. Several brands are also developed to offer unique products that place **ECOINDUSTRY** on the path of progress.

The **ECOINDUSTRY JUNTEx** Industrial Unit is our latest strong investment in the future, built on facilities with unparalleled production capacity in Africa. It produces mortars, tile adhesive cement, and various technical sands, all adhering to the strictest quality standards.

From Angola to the World

ECOINDUSTRY has prepared itself to meet the demands of international markets, adapting its products to the highest international standards and providing multilingual translations. As a result, it has already successfully exported several products manufactured in Angola.

We produce and commercialise the best.

From Africa to the world!

WATER DISINFECTANT

Eco10 is a water disinfectant whose active principle is **10x** more powerful than chlorine. It kills all harmful microorganisms in water, is simple to use and **environmentally friendly** because it does not produce dangerous by-products. When in solution of only 0.3%, it ensures a **safe** and effective disinfection of water.

ECOFOOD

Desinfectante
Frutas & Legumes

Practical and safe chlorine-dioxide based **food disinfectant**. Suitable for the disinfection of all kinds of fruits and vegetables.

ECOWASH

Lava Tudo

Multipurpose with lemon fragrance ideal for cleaning all kinds of surfaces: floors, tiles and small areas of kitchens and bathrooms.

ECOLIXÍVIA

Lixívia Industrial

High quality bleach with broad spectrum fungicide and bactericide. Disinfects all kinds of surfaces such as floors, walls, tiles, utensils among others. It can be used in washing and whitening of clothes.

ECOPURE

ÁGUA DESTILADA

Sterile demineralized water used mostly by professionals, odorless and colorless. Used in batteries, radiators, windshield wipers, irons and others.

SPACE DISINFECTION – SUITABLE FOR COVID-19 CONTROL

CHLORIFY

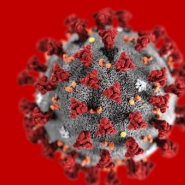

Chemical disinfection of exterior common social spaces.

Ensures efficient and reliable disinfection that prevents the proliferation of pathogens

ALBILEX MULTI BIO CLEAN

It is a **universal disinfectant** spray effective in disinfecting various surfaces and hands. Ideal for combating viruses and bacteria everywhere

ALBILEX SUPER 3

It is a **universal disinfectant spray** with **extraordinary effectiveness** - ideal for sanitizing critical areas. It eliminates pathogenic germs and **prevents recontamination**

WATER TREATMENT CHEMICALS

ECOINDUSTRY specializes in the field of water treatment chemicals in particular:

- Boilers
- Reverse Osmosis
- Cooling Towers
- Water treatments
- Aluminum Sulfate
- Sodium Hydroxide
- Sodium Hypochlorite
- Sodium Chloride
- HTH

JAGUAR

100% Angolan brand **JAGUAR**, manufactured in Angola, which can make a difference to day-to-day construction work, while promoting the principles of the circular economy. The **JAGUAR** brand is proud to offer a wide range of essential products for the construction industry, manufactured daily at its facilities. We currently have adhesive cements, plasters and mortars for joints, developed to exceptional quality standards. In addition, we are constantly innovating and are already working on the development of other products that will soon be available, thus allowing us to further expand our offer and meet the needs of the market in a comprehensive and effective way.

JAGUAR
CONSTRUCTION PRODUCTS

RANGE OF REPAIR AND WATERPROOFING PRODUCTS AND MORTARS
